

Specify Business Problem

The CURA Healthcare Services website is designed to address two important business concerns in the healthcare domain :

Reducing Patient Waiting Time: Patients seeking medical attention can be frustrated by long wait times. In order to reduce waiting times, CURA Healthcare Services works to offer services that are conspicuous, configurable, and responsive. CURA strives to improve patient experience by facilitating appointment scheduling, allocating resources optimally, and guaranteeing smooth patient flow.

Accurate and Up-to-Date Information on Doctor Availability: CURA recognizes the importance of providing patients with correct information regarding doctor availability. Having a current list of accessible doctors aids patients in making well-informed decisions when seeking medical assistance. CURA attempts to keep an up-to-date record of doctor schedules, ensuring that patients have access to the correct healthcare expert when needed.

In conclusion, CURA Healthcare Services aims to improve patient satisfaction by resolving to issues related to waiting times and offering trustworthy information regarding the availability of doctors.
